History

- Precision Pipe Rentals LLC (PPR) was founded in 2013 in Kenedy, Texas focusing on pipe rentals in the Eagle Ford.
- Alongside rentals, PPR quickly started offering inspection, cleaning, and storage services.
- In early 2018 PPR expanded into the Permian with a large facility in Stanton, Texas.
- Due to requested services by clients, PPR created Precision Pipe Works in late 2018 to assist clients in their threading, inspection and cleaning needs.
- In 2020 PPR successfully acquired Inspection Oil Field Services (IOS). Giving Precision the ability to greatly expand its threading and inspection ability as well as obtaining a national footprint.
- Today all three companies employ over 165 individuals.

Precision Pipe Rentals (PPR)

- Whether you are planning for Standalone HCU Plug Drill-Outs, Rig-Assist HCU Plug Drill-Outs, or Conventional Workover for fishing and remediation work on your unconventional and conventional wells PPR is here help and offer solutions to your programs.
- Whether it be Vertical, Horizontal, Heavily Deviated or Extended Reach Lateral drill outs we have, or will find the tubular solution for you.
- From our exclusive 2-7/8" 7.90# P110 TTWS with max torque ratings of 12,000lbs to 1" CS Hydril, we have the ability to services your needs.
- We are continuously adding too and diversifying our inventory, exploring new technology and striving for continuous improvement across all of our locations.

Inspection Oilfield Services (IOS)

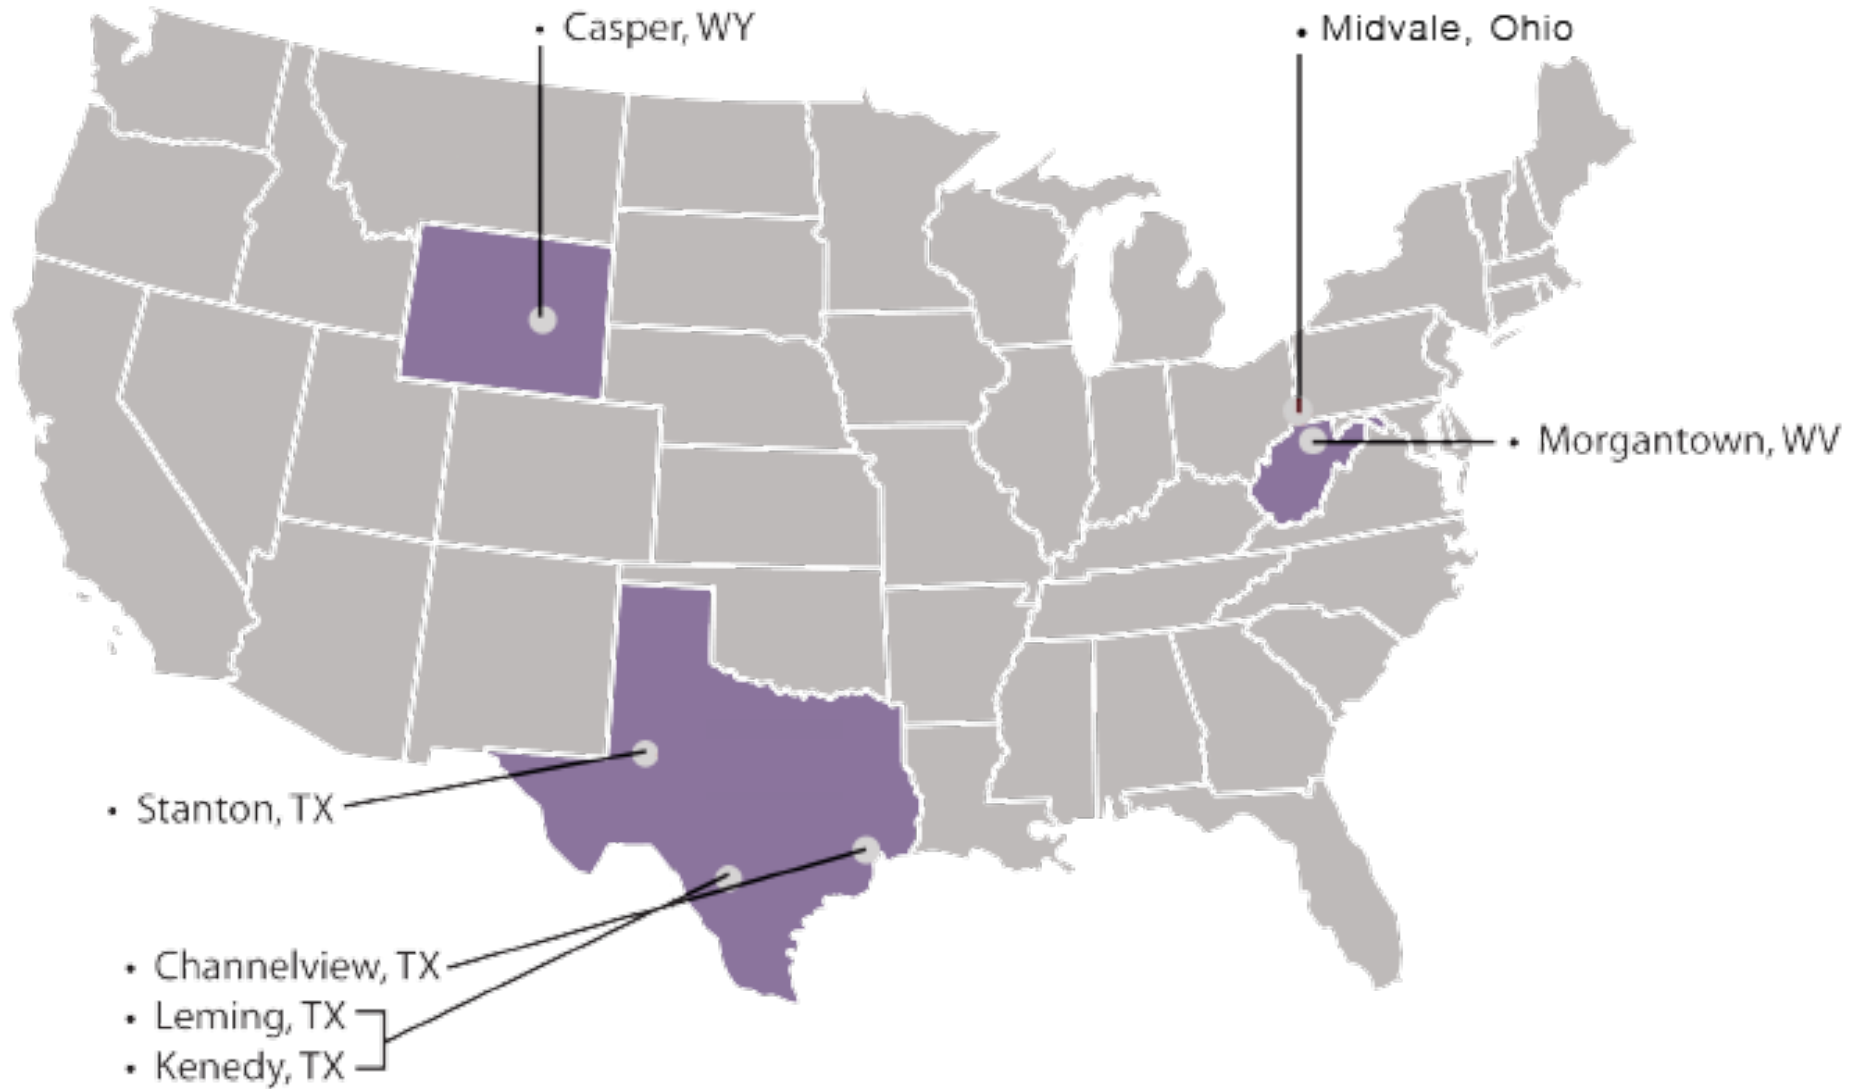

IOS is a leader in non-destructive testing and inspection services for tubular products used in critical oil and gas applications. We have implemented market-leading testing and inspection technologies, as well as developed software that provides customers with detailed information on the integrity of their tubular assets.

Asset integrity services are designed to help customers achieve high levels of safety and document vital information that supports rigid industry standards. IOS also provides conversion services for tubular products that range from premium threading of casing, refacing and hardbanding for drill pipe, as well as cleaning and other repair services for Oil Country Tubular Goods (OCTG).

These services are often combined with IOS non-destructive test and inspection services and marketed through a national network of service and supply facilities.

Safety is a core commitment to our customers, employees, and partners. IOS takes a proactive approach to safety and provides its technicians and inspectors with comprehensive safety and technical training. We follow Occupational Safety and Health Administration (OSHA) guidelines as well as Hazmat PPE standards.

Locations with Semi-Premium Licenses

- **Stanton, Texas**

- 250 Acres with an auxiliary yard with an additional 80 Acres
- 130 Developed acres
- Semi-Premium double line with Doosan 800B
- 2 tubing Four Function EMI range 2 up to 5 ½"
- 1 four function range 3 up to 13 3/8"
- Three cleaning machines with capabilities up to range 1"-7" OD
- With capabilities to produce 20K PSI ID blasting
- Bucking units for 2 3/8" up to 13 3/8" with torque View
- Saw cutter
- All inspection and threading are conducted in covered buildings

Locations with Semi-Premium Licenses

- **Channelview, Texas**

- 73 Acres Fully Developed
- Double ended Semi Premium Line. 4 ½" to 13 3/8"
- 2 four function EMI Range 3
- 1 FBUT machine
- Bucking Unit 4 ½" to 13 3/8" with torque view
- Saw cutter
- Sand Blasting 1"-24"
- 1 Pipe Straightener
- Hydro-Testing

Locations with Semi-Premium Licenses

- **Leming, Texas**
 - 63 acres Fully Developed
 - 1800 foot Rail Spur
 - Hydro-Testing
 - 1 CNC
 - 2 Emi 2 3/8" to 13 3/8"

Morgantown, West Virginia

- Hardbanding
- Casing Inspection (Clean, Visual, Drift & Tally)
- In House / Mobile- Drill Pipe & Tubing Inspection
- DS1 Bottom Hole Assembly Inspection
- ID/OD Tubular Cleaning Services
- Corrosion Resistant Coating
- Hydroblast of ID
- ID, OD and Thread Cleaning
- Lathe/Sandpaper Refacing
- Straightening

Midvale, Ohio

- Tubular Rentals Staging Facility
- Rental Pipe Inspection/Cleaning
- Rental Tool Machining Shop

Regions Served

Permian Basin – West Texas, New Mexico

Eagle Ford – South Texas

Utica/Marcellus – Ohio, West Virginia, Pennsylvania, New York

Niobrara – South Dakota, Colorado, Nebraska & Wyoming

Barnett – Central Texas

Haynesville – East Texas, Louisiana, Arkansas

Scoop/Stack Play – Central, Southern Oklahoma

Anadarko-Woodford – West/Central Oklahoma

Bakken – Montana, North Dakota

Master Service Agreements with 400+ Operators, Mills,
Distributors, & Contractors

Mobile Inspection Services

Our fleet of mobile service crews, vehicles and equipment are available 24 hours a day, seven days a week, providing many of the services offered at our fixed service locations. Our units arrive ready to work with certified technicians and the necessary equipment to quickly get the job done.

IOS mobile units are outfitted with portable refacing equipment which can remove imperfections on shoulders to increase the life span of tool joints.

Our 24/7 Mobile Service Units Inspect:

- Casing
- Tubing
- Drill Pipe
- Drill Tools

Our Mobile Services:

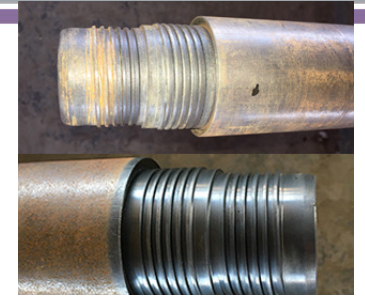

- API Full-Length Drifting
- Electromagnetic Inspection (EMI)
- Hardbanding
- Liquid Penetrant Inspection
- Magnetic Particle Inspection
- On-site Thread Cleaning and Visual Inspection
- Pipe Inspection and Maintenance
- Special End Area (SEA) Inspection
- Straightening
- Thread Cleaning and Visual Inspection

Special Services:

- Corrosion Resistant Coating
- Coupling Bucking
- Hydroblast
- ID, OD and Thread Cleaning
- Refacing
- Scale and Paraffin Removal
- Straightening

Casing and Tubing

IOS and PPW offers inspection of casing and production tubing, frac tubing, and workover strings.

Our Services:

- API Full Length Drifting
- Bevel, De-Dent and Straightening
- Bundling
- Coupling Bucking
- Decontamination Coating
- Dye Penetrant
- Electromagnetic Inspection (EMI) – two and four function
- Full-Length Drift (FLD)
- Full-Length Ultrasonic Inspection
- Hydrostatic Testing
- Inspection and Bolstering of Chrome Tubing
- Magnetic Particle Inspection
- On-site Thread Cleaning and Visual Inspection (VTI)
- Scale and Paraffin Removal
- Special End Area (SEA) Inspection
- Third-Party Monitoring
- Thread Gauging
- Ultrasonic Shear-Wave Inspection
- Weld Line Ultrasonic Inspection
- Well Returns
- ID Rattling and Hydro Cleaning
- OD Cleaning

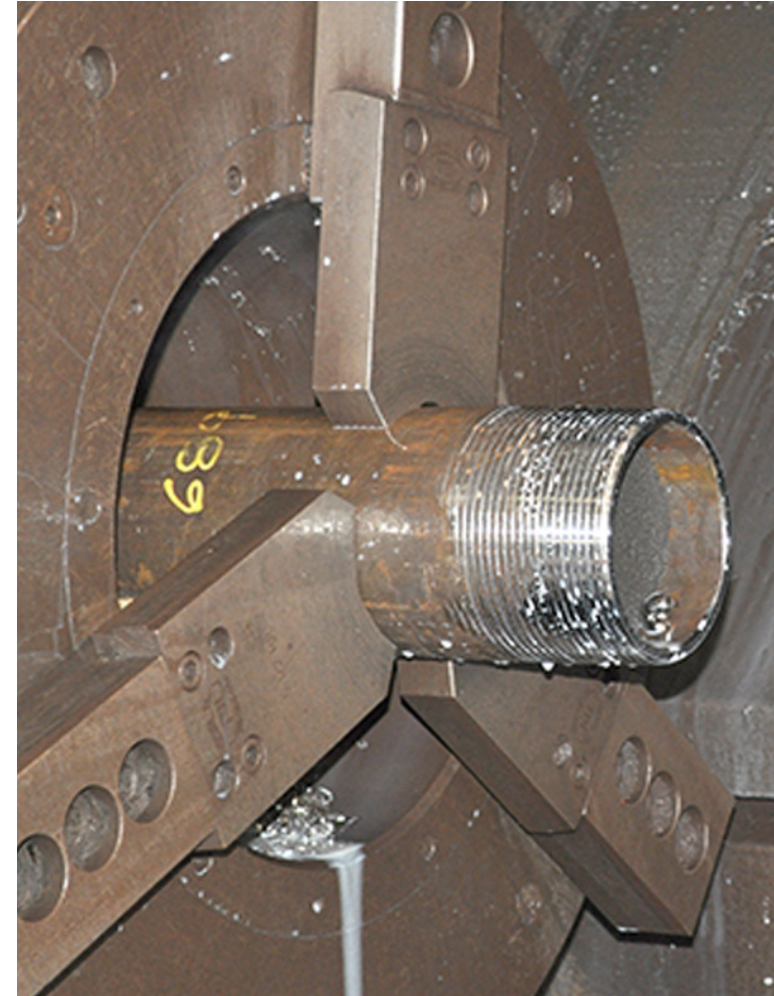

CVD

IOS offers CVD inspections at the rig site and in storage yards when needed. We inspect with fully equipped trucks and trailers to perform this safely and efficiently.

Threading Services

IOS and PPW provide API and proprietary licensed CNC threading services for new and used pipe from 2 3/8" up to 13 5/8".

- API License
- Bucking Services: 2 3/8" up to 13 5/8"
- Proprietary licenses available to correspond to our customers tubular programs
- Threading and Repairs

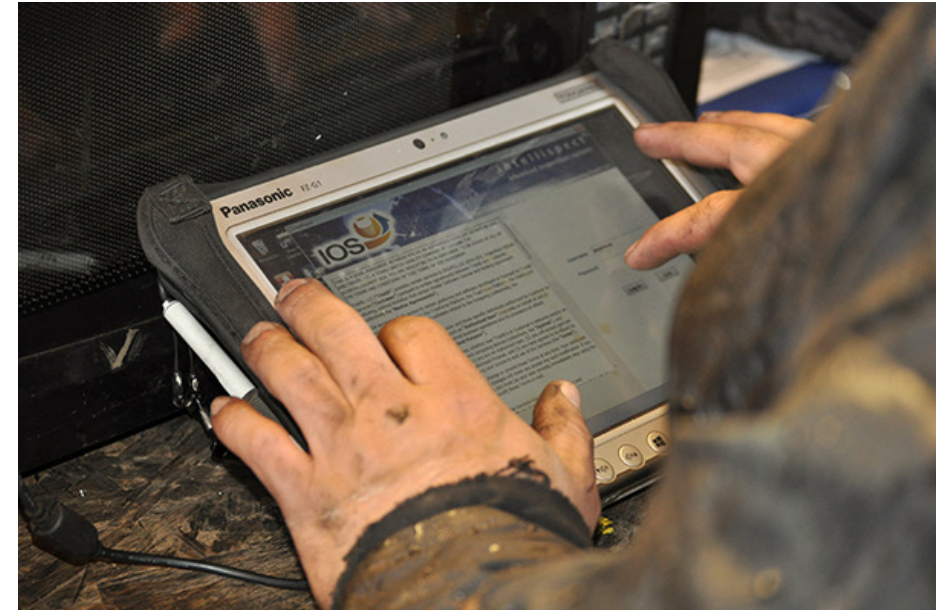

Titan Tablet

Our proprietary TITAN inspection system provides customers with 24/7 secure access to inspection reports, invoices, and the ability to download, save and print files. Reports, invoices and supporting inspection documentation such as pictures are available immediately upon completion of inspection.

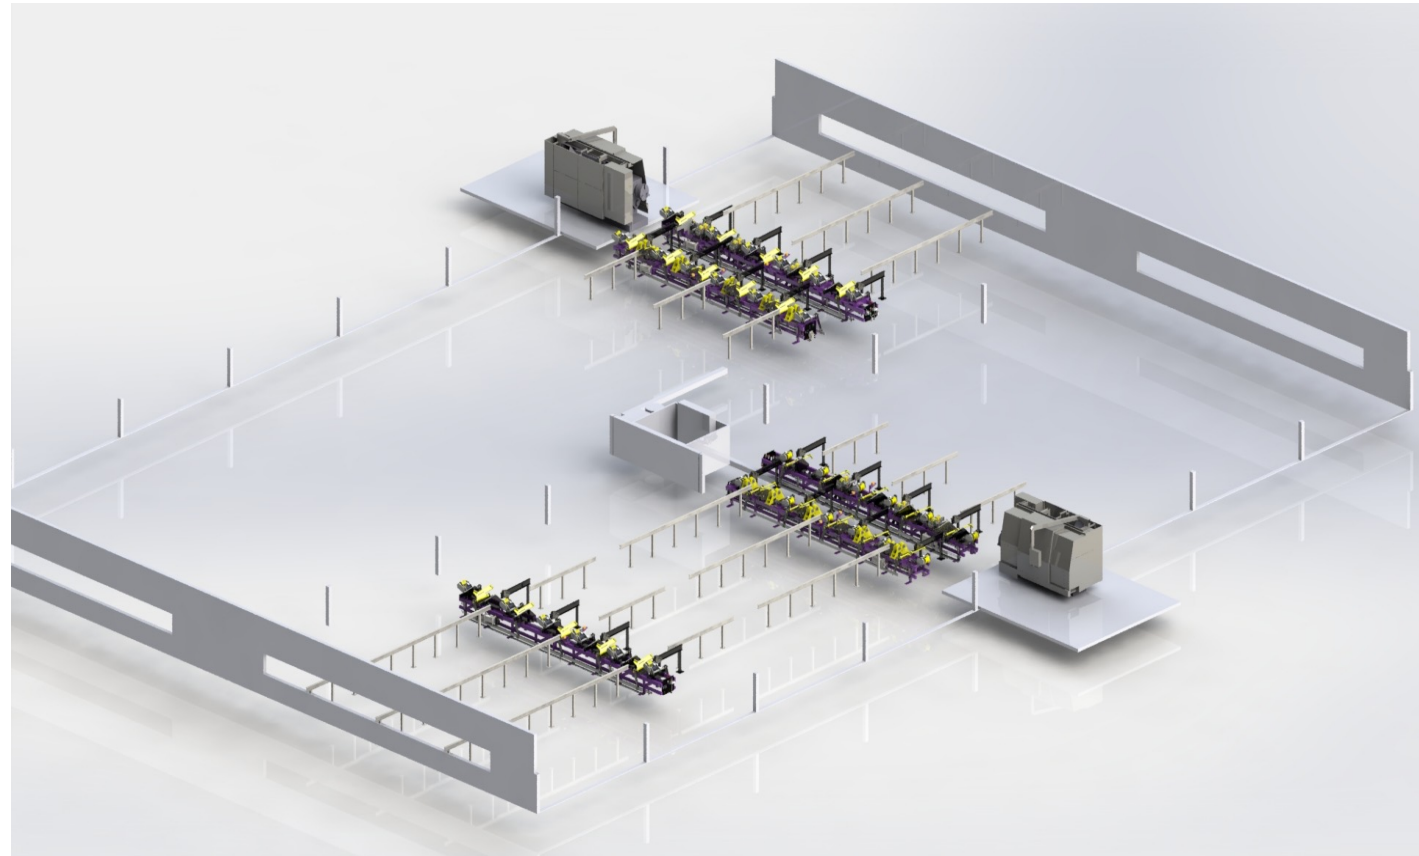

Features and benefits:

- Flexible billing system with abilities to approve work upon completion, or at your convenience through our website.
- Tallies can be downloaded as PDF's or in XLS format, for ease of use.
- Custom reporting options are available; this can be inspection reports, or reporting functions in the system.
- TITAN has a built-in data analysis tool, available to the customer through our website. This feature enables our customers to review inspection results and damages, to build and analyze trends.

New Double Ended Thread Line in Stanton, Texas

- Alongside our 185+ acres of calched pipe storage yard in Stanton we recently built a state of the art double ended threading facility.
- This new facility has the ability to thread Semi-Premium threads twenty four hours a day.
- This threading line began operating in January 2021
- We now have 4 threading machines in Stanton serving the Permian Basin.

Rental Work String Tubulars

- 1" CS Hydril N-80 2.25#
- 1" CS Hydril P-110 2.25#
- 1 1/4" CS Hydril P-110 3.02#
- 1 1/2" CS Hydril P-110 3.64#
- 2 1/16" CS Hydril P-110 3.25#
- 2 1/16" CS Hydril P-110 4.50#
- 2 3/8" EUE L-80 4.70#
- 2 7/8" EUE L-80 6.50#
- 2 3/8" PH6 P-110 5.95# (Hardbanded and Bare)
- 2 3/8" TTWS P-110 5.95#
- 2 7/8" PH6 P-110 7.90# (Hardbanded and Bare)
- 2 7/8" PH6 Q-125 7.90# Bare
- 2 7/8" PH6 P-110 9.50# (Hardbanded and Bare)
- 2 7/8" TTWS P-110 7.90#
- 3 1/2" CS Hydril P-110 9.30#
- 3 1/2" PH6 P-110 12.95#

Rental Tools

- In addition to the work-string tubulars we do offer a full suite of handling tools to accompany the strings. This would include, but not limited to:
- HYT, YT, MYT, LYT Elevators dressed to the size of tubing being used or to customer request.
- Single Joint 5 Ton and 7.5 Ton Single Joint Elevators w/Certified Slings
- Lifting Caps
- Steel & Teflon Drifts for all sizes of Tubing
- Heavy Duty Stabbing Guides to accompany the tubing strings.
- Safety Valves – Class I & II with 10M Pressure Ratings
- Pup Joints – Full Sets available to accompany the tubing strings.
- Miscellaneous Crossover Subs supporting our Rental Fleet or custom built to customer specifications.
- R, RN – X, XN Landing Nipples
- Cargo Baskets
- Compact Location Storage Racks

Rental Tools

Features and Benefits of TTWS

- Ⓕ Connection exceeds Axial load capacity of pipe body
- Ⓕ Replaceable Coupling vs. Replacing costly PH6 Tube
 - Ⓑ Coupling acts as Consumable “wear sleeve”
 - Ⓑ Reduces maintenance and costly *DBR’s to a fraction of Integral Joint Tubing
 - Ⓑ Negative angle, internal torque and external shoulder, acts as secondary seals
 - Ⓑ Rotating Torque ~3X of PH6
- Ⓕ Coupling protects upset pin
 - Ⓑ Pin allows for 2 re-cuts each
- Ⓕ “Hook” Thread Profile
 - Ⓑ Virtually jump-out proof during fishing or pulling
- Ⓕ Radial, metal-to-metal, gas-tight seal
 - Ⓑ Applicable for high pressure applications
- Ⓕ Straight-to Taper thread with a Double Lead
 - Ⓑ Allows deeper stabbing and faster make-ups

TTWS Continued

- The Tejas Tubular Work String (TTWS) Tubing Connection (Patent # 10,024,119) is designed to provide the capabilities required for extended reach, torque intensive, wear-inducing, frac-plug drill-outs.
- The replaceable coupling reduces maintenance costs to a mere fraction of integral joint connections.
- This low maintenance cost, high-torque, fast make-up, easy-stabbing, gas-tight, non-jump out connection, goes where no other has gone before.

Thank you

- We appreciate your time and consideration in Precision Pipe Rentals, Precision Pipe Works and Inspection Oilfield Services.
- Please contact us at +1-432-458-3300 for further information.
